

Cranberry Premium

food supplement

360 mg of cranberry extract!

Cranberry Premium - a dietary supplement in the form of capsules containing high quality cranberry extract (*Vaccinium macrocarpon* Aiton), standardized to a 10% content of proanthocyanidins (PAC); with additional vitamin C.

Large cranberry extract (*Vaccinium macrocarpon* Aiton) is obtained from its fruit. The fruit of large cranberry are a natural source of numerous organic acids, polyphenols, flavonoids - mainly proanthocyanidins, which have been the subject of many studies evaluating their impact on the proper functioning of the urinary tract.

Vitamin C contributes, among others, to the proper functioning of the immune system by supporting the body's natural immunity and helps in protecting cells against oxidative stress, especially because the body is unable to produce it itself. Furthermore, vitamin C is extremely important in many biochemical and metabolic processes, and contributes to the normal formation of collagen and thereby the proper functioning of blood vessels.

Composition

Nutrition information

1 capsule

Large cranberry extract (<i>Vaccinium macrocarpon</i> Aiton) including: proanthocyanidins	360 mg 36 mg
