

Gold DHA

food supplement

Caring for mother and child

600 mg DHA + 400 µg folic acid as full daily intake

Gold DHA is a dietary supplement in the shape of Flow Caps liquid capsules, which complete the diet of pregnant and breast feeding women with DHA acid from the group of omega-3 fatty acids and with folic acid, which contributes to the growth of maternal tissues during pregnancy.

DHA is the main structural fat of brain and eyes, which constitutes up to 97% of omega-3 fats in brain and up to 93% in eyes. The actual supply of DHA in diet during pregnancy and lactation ensures its appropriate distribution into the developing foetus and body of the newly born baby. Folic acid was administered in an innovative way using the micropellets technology, which guarantee optimum speed of transport and absorption in the body.

Composition

Nutritional information	1 capsule	2 capsules
DHA acid	300 mg	600 mg
Folic acid	200 µg (100%*)	400 µg (200%*)

*NRV - nutrient reference value
