

# ReduKAC shot

food supplement

## And you can keep going!

**ReduKAC™** shot is a product intended for quick supplementation of essential ingredients in the body after drinking alcohol. The innovative formulation contains a mixture of electrolytes (sodium, chlorides), glucose, fructose and vitamins from B group (vitamin B6, B12, riboflavin, niacin, pantothenic acid) in perfect proportions.

The product is supplemented with green tea which helps to refresh the body and mind and thus facilitates vitality and contributes to concentration.

The vitamins contained in the preparation (vitamin B6, B12, riboflavin, niacin, pantothenic acid) contribute to the reduction of tiredness and fatigue.

Niacin, similarly to vitamin B6, helps the maintenance of proper psychological functions and proper functioning of the nervous system, while pantothenic acid helps maintain psychological fitness at a proper level. The preparation also contains choline which facilitates proper liver function

## Composition

Nutritional information	1 ampoule (60 ml)
Fructose	2 g

Glucose	3 g
Riboflavin	0,3 mg (21%*)
Niacin (mg NE)	4 mg (25%*)
