

Kolonbiotic Junior

dietary supplement

Replenishment of microflora during and after antibiotic therapy Assistance for the immune system

KOLONBIOTIC® Junior is a synbiotic for children, containing specially selected cultures of lactic acid *Lactobacillus rhamnosus GG* bacteria, in an extremely high concentration of as much as 7 billion (7×10^9 CFU*). In addition, it contains fructo-oligosaccharides and an ingredient which helps in the proper functioning of the immune system.

Lactic-acid bacteria are strains naturally occurring in the human microbiome. Their proper proportion is one of the factors of the microbiological balance of the intestine. *Lactobacillus rhamnosus GG* is a safe strain of bacteria, widely tested, for both adults and children. The probiotic bacteria found in the product are protected using the micro-encapsulation method.

Fructo-oligosaccharides, obtained by enzymatic hydrolysis of inulin from chicory, are a source of energy for probiotic bacteria.

Composition

Nutritional information	1 sachet	NRV*
Vitamin D	20 µg (800 IU)	400%

Lactic acid bacteria	7 billion (7x10 ⁹ CFU**)	-
Lactobacillus rhamnosus GG		

Fructooligosaccharides (FOS)	690 mg	-
------------------------------	--------	---

*NRV – Nutrient Reference Value.

**CFU – Colony Forming Unit.

Ingredients: fructo-oligosaccharides (Orafti®), micro-encapsulated live cultures of Lactobacillus rhamnosus GG (ATCC 53103) bacteria, cholecalciferol – vit. D, anti-caking agent – silicon dioxide.

Purpose

Intended use: For children over 3 years of age as a supplement to intestinal microflora during and after antibiotic therapy, after infections, diarrhoea, and as a supplement to a diet with vitamin D.

Recommendation

Recommended daily dose: 1 sachet daily after a meal for direct consumption or after mixing in a small amount of lukewarm liquid/yoghurt.

In children up to 11 years of age do not use other preparations with vitamin D. In cases of decreased immunity the use of the preparation should be consulted with a doctor.

Do not exceed the recommended daily dose.

Dietary supplements cannot be used as a substitute for a balanced diet.

It is recommended to maintain a balanced diet and healthy lifestyle.
