

# Spoko LOKO - lollipop

food supplement

## Reduces motion sickness

A dietary supplement in the form of lollipops containing ginger rhizome extract and vitamin C.

Ginger extract is conducive to maintaining comfort when travelling by helping to relieve feelings of nausea. The product has been additionally supplemented with vitamin C, which contributes to the reduction of tiredness and fatigue.

## Composition

Nutritional information	1 lollipop	2 lollipops
<b>Ginger rhizome extract (Zingiber officinale L.)</b>	35 mg	70 mg
<b>Vitamin C</b>	15 mg (19%*)	30 mg (38%*)

\*NRV - Nutrient Reference Value.

**Components:** sugar, glucose syrup, acidity regulators - citric acid, sodium citrate; food colouring - cochineal; ginger extract (Zingiber officinale L.), L-ascorbic acid - vitamin C, flavour.

## Purpose

**Purpose:** for children over 3 years of age who experience discomfort during travel.

## Recomendation

**Recommended daily intake:** children over 3 years of age - 1 lollipop per day, half an hour before the planned trip. Children over the age of 12 - 2 lollipops per day - 1 lollipop half an hour before the planned trip, and again if necessary during travel.

Do not exceed the recommended daily intake, i.e. 1 lollipop for children over 3 years of age and 2 lollipops for children over 12 years of age. Dietary supplements cannot be used as a substitute for a balanced diet. Maintaining a balanced diet and healthy lifestyle is recommended.
