

Therm Line Hydrofast

food supplement

For quick removal of excess water from the body and weight loss

Therm Line® HydroFast is a dietary supplement in the form of enteric-coated tablets containing a composition of plant ingredients with a synergistic effect.

Cayenne pepper helps burn fat, and at the same time facilitates the fight against cellulite.

Dandelion, similarly to **nettle and chicory**, helps to remove water from the body along with the metabolic waste products that it contains, and thereby supports the natural detoxification of the body and also stimulates digestion.

Grape seed extract helps reduce cellulite and promotes weight loss. It helps to control body weight and to shape the figure.

Fucus supports digestion and bowel function, enhances satiety and helps to reduce weight.

Chicory promotes weight loss.

The product contains black **pepper extract**, which facilitates the absorption of nutrients, helps maintain proper functioning of the gastrointestinal tract and increases the effectiveness of other herbal ingredients.

**Bioperine® is not a component of organic origin.

Composition

Nutrition information	2 tablets
